

# SANTA ANITA FRACTIONAL TIME COMPARISONS

*Today's Racing Digest*

Shown below is the order of finish that would be likely if each horse repeated a representative race. There are many reasons why this may not happen. Foremost of these is that, like humans, horses have good and bad days. Also, today's race may differ from the representative race due to changes in the post position, weight carried, class, track, surface, pace characteristics etc. Nevertheless, plotting and studying times from previous performances is a basic part of handicapping. If the representative race was not on a normal track, the times shown have been adjusted by the track variant applicable. The underlined fractions indicate the leader(s) at that particular point in the race. Except for the LF = Last Fraction, which indicates the fastest closer(s). X = No recent or available time at or about the distance. The date of the selected, representative race is shown followed by a number indicating how many races back it was.

## MAJOR TRACK FRAC PACK AVAILABLE ON-LINE

A Fractional Charting package is available on our website each racing day when at least four of the tracks we cover are racing (the package will usually contain So Cal, No Cal, Kentucky and New York). In the package, you get a Fractional Chart Page for each of the four tracks and occasionally a bonus track when available. Individually, each page costs \$4, but with the Major Track Frac Pack, you get four tracks for \$8, a savings of \$8. Available now at [www.todaysracingdigest.com](http://www.todaysracingdigest.com)
